

EVAPORATION PAN

FEATURES:

- **NWS Standard**
- **Stainless Steel**

The P/N 103005G Evaporation Pan is a standard, National Weather Service Class A type for evaporation measurement. It is normally installed on a wooden platform set on the ground in a grassy location. The pan is filled with water and exposed to represent an open body of water. The pan is normally filled to within 2.5 inches of the top of the pan. The evaporation rate can be measured by manual readings or with an analog output evaporation gauge,
