

MAVA300 FIELD SHOWER

MAVA300 is a portable and rugged decontamination shower designed for demanding field operations for users like military and civil defence operators.

MAVA300 is used for immediate decontaminating of **NBC** (nuclear, chemical and biological) **agents** from personnel and equipment in field. Lead-time of one person is only few seconds.

MAVA300 is light, durable, portable and easy to use. It can be rapidly deployed close to the incident or hot zone, thus avoiding the spread of any contamination into other areas. One person wearing safety clothing can set up or pack away the MAVA300 in just five minutes.

MAVA300 has been developed for Defence Forces. MAVA300 is a result of years of product development according to high requirements of Finnish Defence Forces.

Technical Features	
Height	2450 mm
Width	1020 mm
Weight	50 kg
Water usage	110 l/min at 5 bars pressure
Coverage	14 m ² (E-96)
Operating pressure	Max 8 bars
Operating temperature	-25C° ...+40C°
Main metal parts	Aluminium
Nozzles	8 pcs of brass nozzles
Hose	Rubber
Colour	Army Green, camouflage painted
Note!	Automatic mud separator when muddy water (lake etc.) is used
